

December Nurse's Notes

It's hard to believe it's December already! This year is flying by! **Cough and cold season** is upon us. Please encourage hand washing. It is a simple way of preventing the spread of germs. Please pay particular attention to the *illness guidelines* to prevent the spread of germs. If your child has had a fever, they cannot return until they have been fever free for 24 hours without the use of Tylenol or Motrin etc. **It's still not too late to get protected from the flu.** I highly encourage everyone to get the flu vaccine or Flu-Mist (if available/appropriate). The flu vaccine supply is plentiful this year. If you need information about this, please call me.

Hearing and vision failure referrals have been sent out to those students who failed the initial screening and the rescreening follow up. It is important for me to receive the completed referral so that I can make sure that your child is receiving the proper care while at school.

Kindergarten and 4th grade parents... if you have not turned in a physical for your child, please remember that they are needed. Also, a physical is required for any student who is new to the school system.
